

TTP-500 Mould finisher

MULTIFUNCTIONAL ULTRASONIC

Powerfull ultrasonic polishing

Fast removal effect by EDM

Refurbish textured surfaces

Coating function by reversed EDM

Power next to no other ultrasonic mould polisher!

Tracytec

Smart solutions for welding and polishing of moulds

A multifunctional mould finisher!

Besides ultrasonic polishing the TTP-500 can do:

EDM: Electrical-Discharge-Machining by hand, also named "fast removal effect". **ETCH** mode to do or refurbish EDM and other textured surfaces.

REVERSE mode where the material in the handpiece are deposit on the workpiece surface.

Powerfull ultrasonic polishing

The ultrasonic polishing has power next to no other ultrasonic mould polisher. It can use most abrasive tools such as:

- Diamond files and diamond fiber sticks
- Ceramic fiber sticks
- Abrasive paper
- Wood stick and diamond paste

Fast removal effect by EDM

Unique EDM function are extremely helpful to do many jobs. Also named "fast removal effect", as it is often used for very rough surfaces which are difficult to handle by normal abrasive hand tools.

The TTP-500 is delivered in a high quality case.

Refurbish textured surfaces

The Unique ETCH function can do or refurbish EDM and other textured surfaces. The machine have 99 steps which enables you to match most surfaces in the mould.

Coating function by reversed EDM

This function is widely used to reinforce mould surfaces. By putting wolfram/tungsten in the toolholder you can coat the mould surface. The layer is significantly thicker than those done by a tribology process.

Specifications

Size	330 × 215 × 175 mm
Weight N/G	8,0 kg / 12,0 kg
Power	160W / 230V, 50 Hz
